Versati and Outstanding Features

Based on German manufacturing technology, especially in motor and rotor design, Versati™ centrifuges have elaborate mechanical performance not only in speed but also in flexibility and versatility.

- **Compact Design**

- Exceptional capability in compact dimensions maximizes workspace.
- Small footprint and curved design ensure comfortable loading and unloading of samples and cleaning of the unit.

- **High Rotor Speed**

- A powerful combination of motor and rotor results in high-speed capacity up to 15000 rpm/21,380 x g for MCV / MCR, 15000 rpm/ 21382 x g for TCV, and 16000 rpm/ 24320 x g for TCR.

- **Large Capacity**

- Diverse specifications of rotors make capacity respectively ranges from 4 x 8 PCR strips (4 x 8 x 0.2 ml) to 44 x 1.5 / 2.0 ml for MCV / MCR, and from 24 x 1.5 ml / 2 ml to 4 x 250 ml (swing-out rotor), and 6 x 250 ml (angle rotor) for TCV / TCR.

- **Incredible Flexibility**

- A wide choice of easy and interchangeable rotors meets all your application needs using microliter, blood, and Falcon type conical tubes. A huge selection of adapters allows centrifugation of practically all commercially available tubes.

Powerful Refrigeration System (for MCR and TCR)

- **Environment-Friendly Refrigeration Technology**

- Designed with CFC-free refrigeration system, causes no harm to the atmosphere.

- **High Temperature Ramp Rate**

- The compressor in Versati™ centrifuges has strong power, which allows a fast cooling rate. The time cost can be as low as 10 mins when the temperature decreases from room temperature to 4°C.

- **Wide Range of Temperature Setting**

- Versati™ centrifuges does not only have a cooling function, but also a heating function. The temperature setting range is from -20°C to +40°C.

- **Perfect Performance**

- Swing-bucket rotors of TCR can be spun at maximum speed and still maintain -2°C.

- **Fast Pre-cooling**

- If the samples are temperature-sensitive, it is helpful to precool the centrifuge, the rotor, and eventually the buckets to the needed working temperature. Versati™ centrifuges provide fast precooling function (about 10 mins) that is maintained even when the centrifuge is not in use.

Superior Safety

- **Genuine-Protect™ Safety Lid Design**

- Lid with motor-driven design ensuring safety of users from accidental release of aerosols and probable misuse.

- **V-balance™ Weight Imbalance Protection**

- Versati™ centrifuges are equipped with active weight imbalance-identification system. In case the rotor is not equally loaded, the drive will turn off during acceleration and the rotor will then decelerate to a stop.

- **Overspeed Protection**

- Equipped with a speed detection system. Once the speed exceeds the safety range, the alarm will sound off, and rotation is halted.

- **Overtemperature Protection**

- With an overtemperature alarm for the chamber, rotor, and frequency converter. Once an overtemperature is detected, the unit will stop running. This provides comprehensive protection which prolongs the life span of the centrifuge.

- **Aerosol-tight and Autoclavable**

- High-quality, extremely robust aluminum lid of rotor allows aerosol-tight centrifugation. Rotor, buckets, lids, and adapters are autoclavable (20 min, 121°C) to ensure sterility of the centrifuge environment.

- **Alarm System**

- Audible and visual alarms are activated during system failures and error message is displayed on LCD for troubleshooting.

- **Safety Standards Followed**

- All models are manufactured according to international safety regulations such as IEC 61010, EN61010-1, EN61010-2-2, ISO 9001, and CE.
